†Miching mallecho. Occurs only in the Shaks. passage quoted, and echoes of it; of uncertain form, origin, and meaning.

It is probable, though hardly certain, that the first word is MICHING *ppl. a.* The conjecture that the second word represents Sp *malhecho* misdeed (whence Malone and subsequent editors print *mallecho*) yields a fairly satisfactory sense, but there is no evidence that the Sp word was familiar in English, and its pronunciation (*malʧo*) does not account for the forms in the early editions.

The root **meg-* (represented also in Armenian *mets* great, and perh in L *magnus*) appears to be allied to the Aryan root **magh-* of Skr *mah, maha, mahan* great

The OE. form *mycel* (which is not a mere graphic variant of *micel*, but stands for an actual pronunciation) is difficult to explain, it is commonly supposed to be due to association with *ȳðel* LITTLE *a* The similar change of *i* into *y* in ON *mykell, myk-*, is believed to proceed from the influence of the *u* in the inflected forms *mikli, miklum*, but this explanation is not applicable to OE

The phonology of the ME and modern forms is in many points obscure Normally, OE *y* would become in the S W *u*, pronounced (u), and elsewhere *i*, the abnormal *u* (in ME also written *o*) of the *β* and *ε* forms has not yet been satisfactorily explained The forms with *k* are northern and north midland, the regular southern forms with *ch* are obsolete, having given place to the shortened *much*, MUCH

In present dialectal use the prevailing form is *muckle*, but *mickle* and *meikle* are often used by modern Scottish writers even when their own colloquial dialect has only *muckle* The archaistic use in non dialectal poetry is rare, and almost confined to the form *mickle*]

1. Originally, the Roman lineal measure of 1,000 paces (*mille passus* or *passuum*), computed to have been about 1,618 yards Hence, the unit of measure derived from this, used in the British Isles and in other English-speaking countries Its length has varied considerably at different periods and in different localities, chiefly owing to the influence of the agricultural system of measures with which the mile has been brought into relation (see FURLONG). The legal mile in the British Empire and the U.S. is now 1,760 yards. The Irish mile of 2,240 yards is still in rustic use The obsolete Scottish mile was longer than the English, and probably varied according to time and place, one of the values given for it is 1,976 yards.

The use of the sing form with a plural numeral is now only vulgar or dialectal, in the earlier part of the 19th c it was recognized as permissible colloquially

2. Used to render its etymological equivalent in other European languages

In Italy (where there are many different miles), Spain, and Portugal, the 'mile' has been developed from the ancient Roman measure, and its length ranges between ¾ and 1¾ English mile. In Germany, Austria, Holland, and the Scandinavian countries, on the other hand, the 'mile' seems to represent the ancient Germanic *rasta*, to which the Latin name was apparently applied arbitrarily, its values range from about 3¾ to over 6 English miles

3. *Geographical, geometrical,* †*maritime, nautic(al mile*. a measure of length = one minute of a great circle of the earth.

Owing to the fact that the earth is not a true sphere, the 'mile' as thus defined varies considerably, the difference between the extreme values being about 62 feet, when taken as a minute of the meridian, the value increases with the latitude, in consequence of the varying curvature It has therefore been found convenient to assign a standard value for nautical use, the British Admiralty fixes it at 6,080 feet

The quots below enclosed in square brackets are probably to be explained as instances of the idiom by which a prep governing a relative expressed or understood is removed to the end of the sentence (cf quots 1674, 1711, 1726 in d) But the indefiniteness of the antecedent and the presence of a transitive verb in the sentence render the passages liable to be taken as anticipations of the modern colloquial practice, which may indeed have been partly developed from expressions of this kind

4. Ecclesiastical and religious uses.

a In Pre-Reformation English, applied to a person in orders officially charged with some function in the celebration of worship in a particular church, chapel, chantry, etc. In the rubrics of the Book of Common Prayer the word denotes the clergyman, or any of a number of clergymen, engaged in conducting worship on a particular occasion.

Then shall the Priest say the Lord's Prayer.

b In phrases such as *minister of the church, of the gospel,* and the scriptural phrases *minister of God, of Jesus Christ, of the sanctuary,* applied as general designations for a person officially charged with spiritual functions in the Christian Church Hence from the 16th c onwards (after the example of foreign Protestant, esp Calvinistic, use) employed *absol.* in the same sense, at first chiefly by those who objected to the terms *priest* and *clergyman* as implying erroneous views of the nature of the sacred office. The use of *minister* as the designation of an Anglican clergyman (formerly extensively current, sometimes with more specific application to a beneficed clergyman) has latterly become rare, and is now chiefly associated with Low Church views, but it is still the ordinary appellation of one appointed to spiritual office in any non-episcopal communion, esp of one having a pastoral charge The term *minister of religion,* as applied to a 'clergyman' or 'minister' of any religious denomination, is common in official use.

1. A kind of fur used as a lining and trimming in ceremonial costume

French lexicographers say that *menu vair* is the fur of the *petit-gris*, a variety of the common squirrel. What the Eng *miniver* meant in early use is uncertain, some have supposed that it was the white fur of the Siberian squirrel, the application may have varied at different times, but etymology would suggest that it must have been an artificially spotted or variegated fur, with a smaller pattern than that of *vair* In 1688 R Holme explains *miniver* as 'plain white fur', and this (notwithstanding Cotgrave's divergent explanation) may have been the meaning of the word as used with reference to the costume of judges and the lower nobility in the 16–17th c In this sense the term was revived in the official regulations for the coronation of Edward VII, and it has since had some currency in the description of the ceremonial costume of peers

2. In early use (i e down to the end of the 16th c.), a general designation for any one whose profession was to entertain his patrons with singing, music, and story-telling, or with buffoonery or juggling In modern romantic and historical use commonly with narrowed and elevated application. A mediæval singer or musician, esp one who sang or recited, to the accompaniment of his own playing on a stringed instrument, heroic or lyric poetry composed by himself or others

The use of the word in romantic poetry and fiction has so coloured its meaning that the application to a mere jester, mountebank, or conjuror, originally common, would now seem inappropriate

Minument, obs form of MUNIMENT.

Minus (mə·ĭnŭs). Also 5 mynus. [a. L. *minus* neut of *minor* less. see MINOR *a*.

The quasi-prepositional use (sense 1), from which all the other Eng uses have been developed, did not exist in Latin of any period It probably originated in the commercial language of the Middle Ages In Germany, and perhaps in other countries, the Latin words *plus* and *minus* were used by merchants to mark an excess or deficiency in weight or measure, the amount of which was appended in figures The earliest known examples of the modern sense of *minus* are German, of about the same date as our oldest quotation In Widmann's book on commercial arithmetic (1489) the signs (—) and (+) occur for the first time in print, and are directed to be read as *minus* and *mer* In the *Bamberger Rechenbuch* (1483) the tare to be deducted from the weight of a package is called *das Minus* In a somewhat different sense, *plus* and *minus* had been employed in 1202 by Leonardo of Pisa for the excess and deficiency in the results of the two suppositions in the Rule of Double Position, and an Italian writer of the 14th c used *meno* to indicate the subtraction of a number to which it was prefixed For the passages referred to, see Cantor, *Vorlesungen über Geschichte der Mathematik* II (ed 2, 1899)

The origin of the symbol (—), read as *minus*, is disputed, some have conjectured that it arose as a merchants' mark, while others believe it to descend from the *obelus* (see OBELISK 2) used by ancient critics to indicate that a passage should be removed from the text It has certainly no historical connexion with the mark ℏ (explained as the letter ψ inverted) used by Diophantus for the same purpose. In Denmark the sign (—) is used for *minus*.]

Minute (mi·nit), *sb*¹ Forms 4 mynut, 4–6 mynute, 4–7 minut, 5 mynwt, mynnate, 6 mynite, -ewte, -iute, *Sc* minuth, munet, -it, 6–8 mynuit, 7 min-, mynutte, minit, minnite, 4– minute. [In senses 1–3 and 6 a F. *minute* fem. (whence G *minute*, Du. *minuut*), ad L *minūta*, subst. use of the fem. of *minūtus* MINUTE *a*. In senses 4 and 5 ad L. *minūtum* (the neuter of the same adj.) used subst in various applications in late Latin. Sp, Pg. and It have *minuto* masc. (ad. L. *minutum*) in senses 1–3, but *minuta* (after Fr.) in sense 6

Senses 1–2 (whence sense 3 is derived) represent the med L *minuta*, more fully *pars minuta prima*, denoting the $\frac{1}{60}$ of a unit in the system of sexagesimal fractions (med L *minutiæ physicæ*), which, originally derived from Babylon, was used, like the modern decimals in scientific calculations as more easy to handle than 'vulgar fractions' (*minutiæ* simply) The lower denominations of the system were (*partes minutiæ*) *secundæ* (our 'seconds'), *tertiæ*, *quartæ*, etc, the understood denominators being the successive powers of 60. The system (ὁ τῆς ἑξηκονταδος τροπος) was recognized by Ptolemy (*c* 150 A. D.), who applied it to the degree (μοῖρα) of the circle, to the sixty sections into which he divided the radius, and to the day, the application of the system to the division of the hour is much later, perhaps not earlier than the 13th c Ptolemy has no terms corresponding to the med L. *minutiæ*, *secundæ*, etc., but merely uses μέρος 'part' or ἑξηκοστον 'sixtieth'. The word *minuta* is referred to as a term of the 'mathematici' (app meaning 'minute' of the circle) by St Augustine *De diversis Quæstt. octoginta tribus* XLV, who also mentions *minutæ minutarum*, 'minutes of minutes' (see 2), *i e* seconds

Sense 6 is from F *minute*, though Littré has no example before 16th c., and the one quot for med.L *minuta* in this use is of date *c* 1500 The primary notion seems to be that of a rough copy in *small* writing (L *scriptura minuta*) as distinguished from the 'engrossed' document]

Mis- (mis), *prefix*1 (also 1 (*rare*), 2–7 **misse-,** 3–6 **misse-, mysse-,** 3–7 **mys-,** 4–5 **mes-**), represents OE. *mis-* = OFris, OS *mis-* (MDu *mis(se)-, mes(se)-,* Du. *mis-*), OHG. *missa-, missi-, misse-, mes-* (MHG *mis(se)-,* G *miss-*), ON *mis-,* Goth. *missa-* (in *missadêþs* MISDEED, *missaleiks* different, various, see MISLICH, and *missaqiss* 'speaking diversely', disagreement, tr Gr *σχίσμα*):—OTeut. **misso-* (whence **missyan* MISS *v*), repr a pre-Teut. formation with ppl suffix *-to* on a root ending with a dental. The adj **misso-* seems to have had two senses: (1) divergent, astray, (2) mutual, alternate (cf Goth. *missō* mutually). The first of these supports the identification of the root with the Teut **miþ-* to avoid, conceal (see MITHE *v*); the two senses may be accounted for by the supposition that the primitive notion expressed by the root was that of difference or change Phonologically, the Teut root might represent a pre-Teut form either with *t* or *th* On the former view, some scholars regard it as cogn w. L *mittĕre* to send, let go; but the sense seems too remote. On the other assumption, it would be cognate with Skr. *mith* 'to meet as friend or antagonist, alternate, engage in altercation' (M Williams), *mithu* 'alternately, falsely, wrongly', *mithas* 'mutually, reciprocally, alternately', *mithya* 'invertedly, contrarily, incorrectly, wrongly'; cf OSl *mitĕ, mutiti* alternately. The root **meith-* in these words is by some regarded as an extension of **mei-* to change see MEAN *a*1

In OE and ME MSS the compounds of *mis-* (as of other prefixes) are written sometimes as two words, sometimes continuously, the hyphen being never used From the 16th c onwards the compounds are regularly printed as one word, with or without the hyphen, which becomes, however, less and less frequent, and is now employed chiefly in new or rarely-used formations, and in words like *mis-say* or *mis cite,* where its omission would tend to disguise the identity of the compound or suggest a wrong pronunciation. (In Sir T More's Works 1557, the spelling of the compounds as two distinct words was retained, e g *misse remember, mysse rule*) The spellings *mispel, mispend,* etc for *mis spell, mis spend,* etc. were once common and are found as late as the end of the 18th century.

The predominant meaning of the prefix in English, as in the other Teutonic languages, is that of 'amiss', 'wrong(ly)', 'bad(ly)', 'improper(ly)', 'perverse(ly)', 'mistaken(ly)', and this is the only one now recognized in the formation of new compounds. But even in OE. there are instances of its use as a mere negative prefix and also as a pejorative intensive with words of sinister meaning (see 7 and 8 below).

In early ME. a great extension of the use of the prefix took place, *mis-* being freely combined with words of indigenous and of foreign origin alike. Many of the new compounds appear to have been suggested by French formations with *mes-* (see MIS-2), thus we have *misbelieve* after OF. *mescreire* (mod. *mécroire*), *misfortune* and *mishap* after OF. *meschance* (see MISCHANCE); a word like *misjudge* has prob. a double origin, being partly of native formation, and partly an adaptation of OF *mesjuger.* The most prolific period for the formation of *mis-* compounds was the 17th c., to which a considerable number of those illustrated in this article belong; Bacon, Donne, and Bp Hall are noteworthy as employing them largely. They still continue to be formed with considerable freedom, but in certain cases *ill-* and *mal-* are now preferred where writers of earlier periods would have preferred *mis-*

In the ME. period *mis-* became to some extent a separable prefix, thus we have *inumen mis* and *misnumen, don mis* and *misdon, seyn mis* and *misseyn,* side by side. (See further under MIS *a.* and *adv*) Even as late as the 16th c., the prefix was sometimes co-ordinated with an adj. or adv, as in the example *very erroniouse and misopenions* (see MISOPINION) A related phenomenon, of which an instance is found as late as the 17th c, consists in the dropping of the prefix before the second of two compounds coupled together, e. g. *ich abbe misseien mid egen, mid mine eren iherd* (Lamb Hom p. 189), *myslyuyng and techynge* (Wyclif), *mis gyed and led, yee mis happe and cheeue* (Hoccleve), *for thou hast mis-said or done* (J. Davies *Ecl.* 1614).

In OE. *mis-* was prefixed to verbs, active and passive participles, nouns of action and condition, and adjectives. In ME. its composition with agent-nouns and adverbs followed as a matter of course, and the principle of prefixing it to any word of the above classes, existing either actually or potentially, became soon established Hence, in a group of formally related words such as *misrepresent* vb., *misrepresentation, misrepresentative* adj and sb., *misrepresentatively* adv, *misrepresenter, misrepresenting* vbl. sb. and ppl a., it is possible (unless there is historical evidence to the contrary) that each member may have been formed independently of any of the others.

All those compounds of *mis-* with respect to which there is evidence of a continuous history during any period, or which belong to a group, are treated in their alphabetical places. Those illustrated in the present article are for the most part nonce-words of obvious meaning

1. Prefixed to verbs, with the meaning 'amiss', 'badly', 'wrongly', 'perversely', 'mistakenly'.

In OE about 40 of such compounds are recorded, of which less than half are represented in ME or mod E. (see MISBEDE, MISDO, MISFARE, MISFERE, MISLEAD, MISLIKE, etc)

As now apprehended, the prefix normally implies not censure of the act itself, but only of its manner. With this restriction, nonce words may be formed very freely In the 17th c the use was much wider, and many of the formations of that period would now be inadmissible

b. In the 14–16th c a few verbs like MISDEEM, MISTHINK, in which the prefix had originally its normal function, developed new senses in which it had the force of 'unfavourably'. Then also arose a few new formations, such as MISBODE, MISDOUBT, MISDREAD, in which *mis-* was prefixed to a verb expressing suspicion or fear, in order to render more fully the notion of uneasy feeling contained in the vb. These new senses and combinations, however, now survive only as *arch* or *dial.*

9. The existence of pairs of words like *misbelieve* and *disbelieve*, *mislike* and *dislike* gave rise to confusion between the prefixes and to the (often unmeaning) substitution of *mis-* for *dis-* (and even *des-*), as in †*misguise*, †*mismay*. To the same confusion are due the dial *misdain*, *misdainful* (after *disdain*), *miscry* for *descry*, and *mislest*, corruption of *molest*, also the obs. *mislaundre* for *dislaundre* Disclander

Mis- (mis), *prefix*[2] (Forms: 3–5 mes-, 4 mess(e)-, 4–5 myss(e)-, 3– mis-) in compounds adopted from French represents OF *mes-* (mod F. *més-*, *mes-*, *mé-*) = Pr. *mes-*, *mens-*, Sp, Pg. *menos-*, OIt. *menes-*, *mins-*, It *mis-* (also med L. *mis-*) —Com. Rom *minus-*, a use of L. *minus* adv 'less, not', as a prefix with the signification 'bad(ly)', 'wrong(ly)', 'amiss', and with negative force, in comb. with verbs, adjectives, and nouns

The list of words derived immediately from OFr compounds of *mes-* is not large, the most important being Misadventure, Mischance, Mischief, Miscontent, Miscreant, Misease, Misnomer, Misprize; but the number due directly or indirectly to the influence of such compounds is prob. much larger (cf Mis-[1]) In English the prefix became ultimately identical in form (as it was in meaning) with Mis-[1].

Mischief, *mischievous*, and *miscreant* are the only compounds of Mis-[2] having the stress on the prefix This is due to the fact that they early ceased to be felt as compounds, and while they followed the rule of stress-change in French-derived words, *mischance* and the rest fell under the influence of the native compounds of Mis-[1], and so have their stress on the root
